Student Debt & Cost of Education

National data on dental schools show mean expenditure per DDS student per year is \$100K

\$100K/yr X 4 yr = \$400,000
Similar to cost to training some medical residents

We Can't Afford to Train Fewer Doctors

By Herbert Pardes
And Edward D. Miller

Seeking to reduce the federal budget, Democratic and Republican lawmakers are looking at cutting funds for graduate medical education. Specifically, they're considering reducing the Medicare reimbursement for doctor training, possibly in half, to cut about \$4 billion from the federal budget. This could dramatically limit the ability of patients to see physicians, even for critical illnesses.

Academic medical centers and teaching hospitals are where young doctors obtain the crucial skills they need to care for us all. As a part of Medicare, graduate medical education reimburses academic medical centers and teaching hospitals for about a third of the direct costs associated with training the next generation of doctors, including salaries, malpractice insurance, equipment, and the extra time necessary for senior doctors to teach procedures to new doctors. Some of the indirect costs of training are also reimbursed, including specialized standby capacity like burn treatment and intensive care.

Even now, not enough doctors are being trained. And population trends, coupled with the expansion of health insurance, indicate that funding for graduate medical

The savings from government funding cuts to graduate medical education aren't worth the negative effect on patients.

education should be increased. If funding is cut, it will reduce the number of well-trained doctors at the very time demand for more doctors is growing. The result for patients? Longer waits, from the parent seeking a "well baby" visit to the recipient of a new pacemaker needing follow-up care. Patients already have a taste of the future, even without the proposed cuts to graduate medical education. Statistics from the Department of Health and Human Services show that 10% of the population today may wait months to see a doctor.

Just five years ago, 70% of doctors' offices were independent physician practices. Now, less than half of doctors own their own practice. Instead, they work in offices owned and operated by hospitals. If this trend continues—and we have no reason to expect it won't—in a few short years private practices will be rare. The result is that hospitals, now preoccupied with the care of their patients, will have less time to spend on the education of their residents. The result is that hospitals, now preoccupied with the care of their patients, will have less time to spend on the education of their residents.

No Federal GME \$ support DDS training

Accruing to the Association CEO of Johns Hopkins Medicine.

Dr. Tankersley Delivers Ethics Lecture

Dr. Ronald Tankersley was the speaker for our annual ethics day program supported by the Mirmelstein Lectureship fund and the generosity of the Virginia chapters of the Pierre Fauchard Academy and the American College of Dentists. Dr. Tankersley spoke to the D1, D2, and dental hygiene classes in the afternoon and then presented to the dental faculty, staff, residents, and community dentists in a separate evening program. Dr. Tankersley is a 1968 DDS graduate and 1971 OMFS graduate from MCV/VCU and Past President of the American Dental Association and the Virginia Dental Association. He is a good friend and supporter of our school and VCU. In his presentation he discussed cultural, economic and neurobiological factors that affect ethical behavior and decision making. He provided compelling evidence that education and peer pressure will lead to more ethical reasoning and decision making. He concluded his presentation by showing the VCU Dental Class of 2014's ethics video called the The Dental Saleman. The class created this video entry for the ADA Student Ethics Video competition. Thank you Dr. Tankersley! Watch or listen at the links below.

Associate Dean for Development and Alumni Relations

I would like to welcome Ms. Gloria Greiner-Callihan as our Associate Dean for Development and Alumni Relations in the School of Dentistry. She comes to us from the University of Tennessee Health Science Center in Memphis, where she was the Assistant Vice Chancellor of Development in the College of Medicine. Gloria received her Bachelor of Science Degree from the University of Texas El Paso, she holds a Juris Doctorate degree from the University of Memphis, and attended the Master of Arts program in Philanthropy and Development at St. Mary's University of Minnesota. She has a wide range of fundraising experience in the arts and education. Gloria will join us in February 2012.

This is a new and extremely important position for the School of Dentistry. In her new position, Ms. Callihan will be reporting to the Dean of the School of Dentistry and to the President or designee of the Medical College of Virginia (MCV) Foundation. The Associate Dean for Development and Alumni Relations is responsible for directing, coordinating, and integrating all fundraising and alumni relations functions and activities for the School of Dentistry. The Associate Dean serves on the Dean's Administrative Cabinet and as an ex-officio member of the Dean's Advisory Board. The Associate Dean leads a staff that includes a Director of Development and Annual Giving, Director of Major Gifts, Director of Alumni Engagement, and two support positions.

I am very appreciative of the efforts of the members of the search committee chaired by Ms. Samantha Marrs, Associate Vice President for Advancement at VCU. The members of the search committee are:

Dr. Bill Kotti, President, MCV Foundation
Mr. Thomas Burke, President, VCU Foundation
Mr. Jim Doyle, Director of Alumni Engagement
Dr. Omar Abubaker, Professor & Chair, Department of Oral & Maxillofacial Surgery
Ms. Angela Easley, Administrative Assistant, School of Dentistry Dean's Office
Dr. Michael McMunn, Member, School of Dentistry Board of Advisors and DDS 1977
Dr. Barrett Peters, DDS 2011, Pediatric Dentistry Resident, 2011-2013

We are also grateful for the work of Mr. Brian S. Thomas, Senior Executive Director of Development for the MCV Foundation. Brian has served as our head of the Office of Development since March of 2010 when I became interim dean in addition to his other duties at the foundation. We look forward to continuing to work with Brian and the MCV Foundation.

Department of Oral Health Promotion and Community Outreach at VCU School of Dentistry

At its November 10, 2011 meeting, the Virginia Commonwealth University Board of Visitors approved the creation of a new department in the School of Dentistry. The Department of Oral Health Promotion and Community Outreach was formed to coordinate and expand community engagement activities of students and faculty in the School of Dentistry. The new department consists of community-based dental education programs (service-learning and community service activities for dental and dental hygiene students) as well as community partnerships for improved access to oral health in urban and suburban areas. The mission of the Department of Oral Health Promotion and Community Outreach embraces a commitment to socially responsible education, patient care, research, and the community in educating competent clinicians who will serve the needs of the public and improve the health and well-being of society. To achieve this mission, the department plans to secure grants to increase access to care by providing services through an enhanced curriculum. In addition, community engaged scholarship through health services research is planned. The BS program in Dental Hygiene will administratively reside within the Department of Oral Health Promotion and Community Outreach and the existing Division of Dental Hygiene faculty will become the faculty of this new department. Ms. Kim Isringhausen, currently Director of Dental Hygiene and Community Based Education Programs, will chair the department. Ms. Michelle McGregor, Assistant Professor, Dental Hygiene, will direct the dental hygiene education program. Final approval for this change was received from the State Council on Higher Education Virginia in December 2011 with an effective date of January 2, 2012.

The Journal of Prosthetic Dentistry selects the most outstanding clinical report to receive the Judson C. Hickey Scientific Writing Award. The article entitled, "Randomized, prospective, clinical evaluation of prosthodontics modalities for mandibular implant overdenture treatment," published in the July 2011 issue was selected as this year's winner. Congratulations to Dr. David Burns and his co-authors, Drs. John W. Unger, James P. Coffey, Thomas C. Waldrop, and Ronald K. Elswick, Jr, for being selected for this award honoring the former Editor, Judson C. Hickey. It is indeed an honor to be selected by peers for such an award.

Burns DR, Unger JW, Coffey JP, Waldrop TC, Elswick RK: Randomized, prospective, clinical evaluation of prosthodontic modalities for mandibular implant overdenture treatment. J Prosthet Dent 2011;106:12-22.

The purpose of this study was to evaluate 3 different mandibular implant overdenture treatments with respect to prosthesis retention and stability, tissue response, patient satisfaction and preference, and complications to determine treatment outcomes. It was concluded that the 2-independent-implant overdenture treatment provided equivalent or more favorable treatment outcomes relative to the more complex and costly 2- and 4-implant bar attachments.

VCU Faculty Participate in ADEA Institute for Teaching and Learning

This past year, we were able to send three faculty members from VCU to a national Institute for Teaching and Learning program sponsored by the American Dental Education Association. This program is now in its seventh year. This was a wonderful opportunity for our faculty as this is a program open only to faculty members recommended by their deans and thus is attended by top rising-star dental faculty from across the nation. The VCU faculty members were Dr. Elizabeth Berry from the Department of Pediatric Dentistry, Dr. Sonali Rathore from the Department of Oral Pathology, and Ms. Anjum Shah from the Department of Oral Health Promotion and Community Outreach. Congratulations to our faculty!

The program included 45 other faculty members from other dental schools. It is interesting to note that sixteen of the participants obtained their dental degrees from institutions outside the US or Canada. Here a link to the complete list of the 48 faculty members and biographical information.

Dr. Nancy F. Langston
Executive Director of Academic Nursing
Virginia Commonwealth University School of Nursing
P.O. Box 980567
Richmond, Virginia 23298-0567

Dear Dr. Langston:

On behalf of Mr. Gattuso and the Virginia Premier Senior Leadership, I am pleased to inform you that the Virginia Premier Grant Program will provide \$150,000 to the VCU School of Nursing to fund "An Innovative Model of Collaboration Between Nurse Practitioners and Dentists to Enhance Oral and Physical Health Outcomes" for fiscal year 2013.

We understand the value of the School of Nursing to the VCU Health System and to the community at large and appreciate the innovative nature of your proposal to collaborate with the School of Dentistry. We look forward to meeting with you next week to discuss specific goals and objectives relative to your VPHP Grant funding.

Sincerely,

A handwritten signature in black ink that reads 'James Parrott'. The signature is written in a cursive, flowing style.

James Parrott
CEO, Virginia Premier Health Plan

DENTISTRY AND NURSING
PILOT INTERDISCIPLINARY GRANT PROGRAM

Purpose and Eligibility

The Interdisciplinary Pilot Research Grant Program between Nursing and Dentistry is provided to fund interdisciplinary, innovative research collaborations joining faculty members from the two schools. The emphasis of these funds is to support interdisciplinary projects aimed at creating a research collaborative that will lead to a larger A.D. Williams multi-school collaborative research proposal.

Funding is possible only for full-time faculty of the two Schools who hold the rank of Assistant Professor or higher.

Procedure

Investigators should use the instructions on the A.D. Williams website for the Multi-School Research Grant Application to develop this grant application. (<http://www.adw.vcu.edu/>)

Proposal must be submitted no later than 5:00 p.m. on March 30, 2012 and proposals should be submitted electronically to Dean's Langston and [Sarrett](#).

Award

Maximum award is \$25,000. Upon receipt of applications, a joint review committee will be appointed by the deans to review and score the proposals.

Funding will begin in May 1, [2012](#). The project must be completed and funds expended within the calendar year.

Oral and pharyngeal cancers

- Diagnosed in 30,000 Americans annually
- 8,000 die from these diseases each year
- Primarily diagnosed in the elderly
- Associated with tobacco & alcohol use
- Growing in young people due to HPV
- Prognosis is poor due to late diagnosis and disparities in care
- 5-year survival rates
 - 56 percent whites
 - 34 percent African American/Black

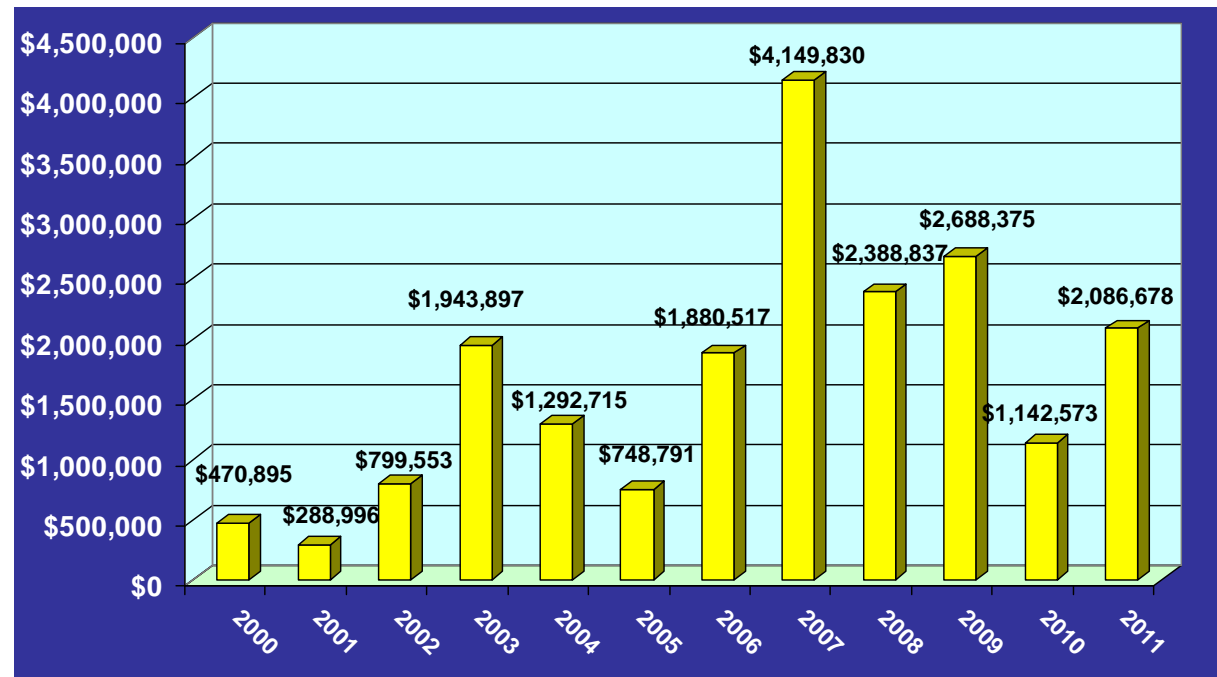

Search for Director of the VCU Philips Research Institute and Chair of the Department of Oral & Craniofacial Molecular Biology

- Virginia Commonwealth University seeks applications for a full-time faculty position as Director of the VCU Philips Institute, and Chair of the Department of Oral and Craniofacial Molecular Biology. The Philips Institute is a newly-expanded university-designated research institute based within the School of Dentistry. The new director will be responsible for promoting the existing research programs of the Philips Institute, which include cancer and infectious diseases as they relate to the oral cavity. This will involve recruitment of new faculty, as well as strengthening of existing collaborations in clinical care, research, and education with the Schools of Engineering, Medicine, Nursing, Pharmacy, Allied Health Professions, and the NCI-designated VCU Massey Cancer Center which has core scientific strengths that include cell signaling and molecular genetics.
- Search is being chaired by Dr. Gordon Ginder, Director of the Massey Cancer Center

New Gifts and Pledges

FY 2011 is the fourth best year in 12 years

Category and Dollars Given (New Gifts and Pledges)

• Alumni	\$1,363,472	65%
• Individuals	\$210,843	10%
• Corporations	\$143,181	7%
• <u>Foundation/Organization</u>	\$369,182	18%
	\$2,086,678	

Category of Donor (Cash)

• Alumni	762	67%
• Individuals	183	16%
• Corporations	180	16%
• <u>Foundation/Organization</u>	20	1%
	1,145	

Scholarship Fundraising as a Priority

Private Scholarships Awarded:

<u>2010</u>	<u>2011</u>	<u>Change</u>
\$66,000/48	\$90,000/66	\$34,000/18 51%/38%

Strategy change in 2011:

- establish a current general scholarship fund;
- promote using a challenge matching amount;
- promote named current scholarship funds;
- promote electronically to connect students with donors;
- promote new endowed scholarships – in 2011 we activated two new endowed scholarships. In 2012, we anticipate establishing or activating six endowed funds.

Class of 1951 Military Salute

A Salute to the DDS Class of 1951

The DDS Class of 1951 is unique in the history of the School of Dentistry. The class membership is wholly comprised of World War II veterans who served in the African, European and Pacific Theaters and in each military branch. Members' experiences included fighting in Patton's Army in the Battle of the Bulge, the awarding of a Bronze Star and witnessing the first flag raised on Iwo Jima.

Upon entering dental school, the Class of 1951 engaged in various manual, spatial and problem-solving tests as research subjects. All entering dental classes across the United States did likewise. Subsequently, test results correlated to their academic performance formed the basis for the Dental Aptitude Test.

At their 50th reunion in 2001, the Class of 1951 presented the school's first ever 50-year class reunion gift. Their \$51,000 initial endowment grew and today supports students' travel to national meetings to present their research findings.

For 59 years, the classmates maintained contact with each other through their newsletter, "Painless Publication." Annually, members submitted personal updates to the editor to share with the class. Editorial duties rotated among all members. This unique tradition concluded with the 2011 edition, coinciding with the class' 60th reunion. The class donated the entire run of "Painless Publication" to the Tompkins-McCaw Library's Special Collections and Archives as a permanent historical record.

On the occasion of their 60th reunion, the School of Dentistry gratefully acknowledges the members of the DDS Class of 1951 for their service to country, patients, profession and school. The members' outstanding examples of class camaraderie and selfless service are enduring legacies for all students to treasure.

Dental Facts for Children (from the U.S. Surgeon General's Report)

- "Oral health is essential to overall health."
- "Oral diseases are progressive and cumulative and become more complex over time."
- "They can affect our ability to eat, the foods we choose, how we look, and the way we communicate."
- "These diseases can affect economic productivity and compromise our ability to work at home, at school, or on the job."
- "Dental caries (tooth decay) is the single most common chronic childhood disease--5 times more common than asthma and 7 times more common than hay fever."
- "Poor children suffer twice as much dental caries as their more affluent peers, and their disease is more likely to be untreated."
- "The social impact of oral diseases in children is substantial. More than 51 million school hours are lost each year to dental-related illness."

"The terms oral health and general health should not be interpreted as separate entities. Oral health is integral to general health."
